

October 20, 2021

ICC Beneficial Electrification Workshop Participants:

I am reaching out to share my contact information and to request feedback from interested parties for the upcoming Illinois Commerce Commission (ICC) Beneficial Electrification Workshops, required by newly enacted [provisions](#) of the Illinois Electric Vehicle Act (EV Act), 20 ILCS 627/45.

The ICC contracted with Celia Johnson Consulting to facilitate the Beneficial Electrification Workshops; I am the lead facilitator. Please feel free to reach out to me directly with any questions or feedback related to the Beneficial Electrification Workshops:

- Email: Celia@CeliaJohnsonConsulting.com
- Phone: (312) 659-6758

The purpose of the workshop process is to solicit input on the design of beneficial electrification programs that Ameren Illinois and ComEd will offer pursuant to the EV Act. The first statutory workshop is scheduled for **Wednesday, November 3, 2021 (10:00 am – 3:00 pm)**. As required by the EV Act, workshops must conclude no later than February 28, 2022.

The ICC Staff is interested in receiving feedback in advance of the November 3rd meeting to help inform the agendas and plans for future Beneficial Electrification workshops, specifically:

1. What topics or questions are important to stakeholders to have addressed through the Beneficial Electrification Workshop process that could inform the utilities' Beneficial Electrification Plans?
2. Do you have suggestions on strategies or process to best reach stakeholders representing environmental justice and/or low-income communities?

Please send feedback directly to me (Celia@CeliaJohnsonConsulting.com) no later than **end-of-day on Thursday, October 28, 2021**.

I will circulate the Agenda and WebEx information for the November 3rd workshop at a future date. This information, as well as suggested topics and questions to have addressed through the workshop process, will also be posted to the ICC's Beneficial Electrification Workshop webpage: <https://www.icc.illinois.gov/informal-processes/beneficial-electrification-workshops-2021-2022>

Please reach out with any questions.

Thank you,

Celia
